# Contents

# **1 Background of the Project**

- globalization - time management

people usually want to use calendars, but they are not user-friendly. Especially when you have multiple calendars, work, school, personal, etc...

# **2 Problem Statement**

- keeping track of your calendar and making sure it is up to date with all the data sources (whatsapp)

# **3 Objectives of the Project**

- saving people time -

# **4 Significance of the Project**

# **5 Scope of the Project**

- decide priority from notification, the action thingy with two buttons. - ask user for when they sleep, when they wake up, like time blocks in the day to put things around. hold times for things for you. excercises (gym) time. - lunch hold automatically, makes sure to plan time for food. - connect your academic schedule, the courses :D - find me x minutes on y day - automatic travel time based on location (lat, lng) - suggest soemthing to eat in the food block.

# **6 Limitations of the Project**

-

## **7 Project Plan**

## **8 Literature Review**
